GENERAL NEWS.

Outrageous Treatment of Prisoners in the Kentucky Penitentiary

LOUISVILLE Feb 5—The legislature is investigating the state prison report. Its condition is shamefully bad. It is overcrowded, the sewerage is defective and unclean, and the diet improper. Scurvy prevails among the prisoners to a fearful extent. At one time over 200 were in the hospital. The total number of cases during the year were [illegible] out of 1000 inmates. The sole cause has been improper food and treatment, and is wholly inexcusable. Mortality has nearly doubled over preceding years, and yet the number of [illegible] is not much if any greater. [illegible] of prisoners is carried to a cruel extreme; the clothing is insufficient, as are the beds and bedding. Six hundred and forty-eight of the cells are only 6 feet 8 inches long and 3 feet 9½ inches wide and 6 feet 3 inches high, and yet over one hundred of these badly ventilated cells have been compelled to hold two convicts during the night for ten or twelve hours. Beastly practices have resulted and disease has been generated. The committee advise the governor to remove the keeper J W Louth.

A Negro Family Burned to Death

COLUMBIA, Feb 5—A negro cabin on the plantation of Captain Wm Hack, thirteen miles north of Columbia, S C, burned Tuesday night. Two men, a woman and six children perished in the flames. She heard one of the children attempting to awaken its father, but without success, and before other assistance arrived the house and all in it burned.

"Gov." Smith's Inaugural.

AUGUSTA, Feb. 5.—"Gov." Smith has issued an inaugural message, and thus refers to the late difficulties: "There can be no half way ground in regard to this great public wrong which should receive the condemnation of every honest citizen, that it may serve as a warning in future to those who, under a free government may attempt to trample on the rights of the people. I would recommend an investigation of the whole subject of arranging, tabulating and counting returns, and that the facts ascertained be made public."

A Nice Point in Replevin Law.

CHICAGO, Feb 5—Judge Rodgers yesterday, in a replevin suit of Clark vs. The Michigan Central Railroad Company developed a nice point in the law of stoppage in transitu. A Boston firm had sold goods to a San Francisco firm and delivered them to a partner of that firm in Boston, who shipped them to their destination. After shipment the San Francisco firm went into bankruptcy, and the goods were replevined in Chicago. The court held that, although the goods were delivered to his partner in Boston at his store, it was only for shipment to the final destination, and that when they once had been shipped toward that point it all constituted one transit. The right to stop goods and revoke the sale was not lost. The purchasers were shown to be insolvent at the time.

CINCINNATI, Feb. 4.—In December, 1863, Wm. Patterson alias John Williams, and Wm Galland alias Garland Williams, then slaves in Scott Co, Kentucky, murdered Darby Martin, a herder, for his money, about $150. Although they were suspected, there was no proof, but recently one of their friends, under sentence of death, gave enough information of the crime to cause their arrest, and they have now both confessed.

An Outrageous Assault.

After a terrible conflict in which he chased them over frozen ground in their night clothes, they escaped. Holmes pretends to know nothing of what he did and will plead insanity. Physicians say that neither Bennfield or his wife can recover.

THE GRANT JOB IN PENNSYLVANIA

Press Comments on the Action of the Packed and Gagged Convention—No Approval from any Quarter.

(SPECIAL DISPATCH TO THE OREGONIAN)

NEW YORK Feb 5—The Sun says of the Pennsylvania convention that Don Cameron worked his absolute will upon the republican convention at Harrisburg yesterday, beating down all opposition with the loaded club of a slight majority and openly committing the party in Pennsylvania to the support of Grant. This is a bold stand to take in view of all the circumstances, but it has been taken deliberately. Don and his mercenaries are playing for a big stake. If Grant can be nominated and elected Cameron and Pennsylvania may count upon inheriting the advantages now enjoyed by Sherman and Ohio. But can Don deliver goods as easily as he has contracted? At all events it is consoling to remember that Pennsylvania is not the whole of the United States and Cameron's pocket borough does not necessarily elect the president.

The *Herald* says the divided sentiment of the Pennsylvania republicans will naturally make an impression on the republican party at large, but the party at large is but little regarded in the calculations of the astute party managers of the third term campaign. They have a definite plan of operations which they expect to carry out without much assistance from the republicans of those states which must elect their candidate after he is nominated. The Grant men will attempt nothing in New England which is for Blaine, nor in the northwestern states, except Illinois, which are for Blaine, nor in Ohio, which is for Sherman. They have strong hopes in the Pacific states and the eighteen delegates from California and Oregon would swell their number to 163, still leaving them 17 short of a majority. They expect to make up this number from the southern states, where Blaine has no strength and where the only rival to expect is Sherman. The south is entitled to 276 delegates, and with the three great states and the two Pacific states the third term candidate would need one less than half of the southern delegates to give him a majority. Nine-tenths of the republican party in the south consists of colored voters and it has never been disputed that the colored voters have a strong and enthusiastic preference for a candidate whom they regard as their deliverer.

The *Times* says of the Pennsylvania convention. It may be an open question whether the action of the convention is in perfect harmony with the preponderance of republican sentiment of the state, but strong as may be the popular feeling in favor of Blaine, it is certain that a good deal of its support in the convention comes from men who espoused his cause quite as much from opposition to the rule of the Camerons as from any special attachment to his claims of the presidential nomination.

The *Tribune* says. Because of the small majority Grant received, the result must be a severe disappointment to the friends of Grant and a hard blow to the movement for his nomination. This narrow majority of twenty was obtained only by strenuous exertions and the use of powerful influence. No one can doubt that if the convention had been left to its own spontaneous voice the Pennsylvania delegation would stand at this moment for Blaine. But this is not all. The majority for Grant, small as it is, is unquestionably due in part to the firm refusal of Blaine's immediate representatives to authorize any bitter assault on Cameron. In view of all these things it may well be doubted whether in voting as they have been instructed to vote the Pennsylvania delegation will fairly represent Pennsylvania's sentiment. But however this may be, one thing is clear, the claim that there is an overwhelming demand among the republican masses for the nomination of Grant, the claim that they believe him to be the only man that can carry the country has been exploded. One more thing is clear, and that is that this year's contests are to be amicably conducted to an amicable result. The nominee of the Chicago convention is not going to be destroyed by enemies around its canvass.

The *World* says. The *World* pointed out yesterday that the real question for the republican convention was not whether the republican party should bear the nomination upon Grant, who undoubtedly has personal strength greater than that of the republican party, but whether Grant should bestow upon the republican party the advantage of his acceptance of a nomination. This view was abundantly sustained by the proceedings of the convention at Harrisburg yesterday. In 1876 the mere informality of an ineligible elector did not count against the vote of Oregon, but Pennsylvania republicans seem to be aware that republican certificates will be more careful[ly] examined at Washington next year than they were three years ago.

The Chicago Press.

CHICAGO, Feb 5—The *Tribune* editorially, after showing that it was a scramble and not a victory for Grant, says. The Pennsylvania delegation therefore stands instructed to cast its entire vote for Grant, but it is believed that fully one third of the delegation are Blaine men, and that Blaine will get every vote in the event of the abandonment of the Grant movement, either before or during the session of the national convention.

The *Inter-Ocean* says. The action of the Pennsylvania republican convention yesterday gives the Grant boom additional strength and volume, and places the Keystone state in the van for Grant. The results summed up are that the delegation is instructed to vote as a unit for Gen Grant at Chicago, and that the action of Pennsylvania must be a strong card for Grant supporters.

The *Times* only recites the acts, with evident condemnation of the proceedings at Harrisburg.

The Cincinnati Press.

The Cincinnati *Enquirer* regards the result as deciding that Grant will be nominated at Chicago, and in case something should intervene and Grant be withdrawn Blaine would doubtless be the nominee. Sherman stands no show.

The *Commercial* regards it as an injury to Grant to force the real sentiment of the state into the shade but enjoins Blaine's supporters not to be downcast.

The *Gazette* takes the same grounds.

How Received at the New York Capital

NEW YORK Feb 5—An Albany special to the *Evening Post* says. The result of the Pennsylvania convention is commented on by republicans here with one degree of caution. Outspoken Grant men approve it and are in favor of the New York convention following the example. They say that the action of the Harrisburg convention shows that Pennsylvania is for Grant and that he will if nominated carry the state with ease. The more conservative republicans are reluctant to criticise the result of the convention. Blaine men predict trouble in the New York convention if an attempt is [illegible] to instruct the delegation in favor of Grant.

Washington Correspondence

CHICAGO, Feb 4—The *Tribune's* Washington special says. It is known that Don Cameron was more interested in the Harrisburg convention than in any other political event of his life. When the Leds and McManes delegation was here McManes was no in favor of [illegible] Grant and during an interview in Cameron's house the latter was greatly excited and walked up and down the floor in a great state of mind, declaring that if he failed at Harrisburg it would be to him his political destruction. It was no longer a [illegible] of sentiment with him [illegible] were [illegible] and McManes [illegible] The point uppermost that all [illegible] hard work only saved a [illegible] a change that numbers will have [illegible] to Grant. THE OPENING OF PARLIAMENT

SPEECH TO "MY LORDS AND GENTLEMEN" BY THE QUEEN

Comments upon Foreign Relations and Recommendations toward the Relief of Irish Distress, etc., etc.

SPECIAL DISPATCH TO THE OREGONIAN

LONDON Feb 5—The weather to day is fine. The royal procession to the parliament house was in accordance with the programme. The queen arrived at the house of lords at [illegible] minutes past [illegible]. Upon receiving a copy of the speech from Lord Cairns the high chancellor her majesty handed it back to him and Lord Cairns then read it. The ceremony [illegible] then [illegible] The speech was as follows:

My Lords and Gentlemen: It is with much satisfaction that I again resort to the advice and [illegible] of my parliament. My relations with all powers continue friendly. The course of events since the prorogation of parliament has tended to furnish a fuller security to the maintenance in Europe of peace on the principles laid down by the treaty of Berlin. Much however still remains to be done to repair the disorder with which the late war has affected many parts of the Turkish empire. A convention for the suppression of the slave trade has been concluded between my government and that of the sultan. At the close of your last session I expressed the hope that the treaty of Gundamuk had happily terminated the war in Afghanistan. In conformity with its provisions my envoy with his retinue was honorably received and entertained by the ameer at Cabul. While engaged however in the exercise of their duty he and those connected with the embassy were treacherously attacked by overwhelming numbers, and after a most heroic defense were almost all massacred. An outrage so intolerable called for condign chastisement, and my troops which, pursuant to stipulations of the treaty either had withdrawn or were withdrawing from the territories governed by the ameer were ordered to retrace their steps. The skill exhibited in the rapid march upon Cabul and in the advance upon other lines of action reflects the highest credit upon officers and men of my British and native forces, whose bravery has shown with its wonted luster in every collision with the enemy. The abdication of the ameer and the unsettled condition of the country, renders the recall of my troops impossible for the present, but the principle on which my government has hitherto acted remains unchanged, and while determined to make the frontiers of my Indian empire strong I desire to be on friendly relations alike with those who may rule in Afghanistan and with the people of that country.

My anticipations as to an early establishment of peace in South Africa have been fulfilled. The captured position of the Zulu king and the breaking up of the military organization on which his dynasty was based have relieved my possessions in that part of the world from dangers which would seriously impede their advancement and consolidation. In Basutoland a native outbreak of considerable importance has been effectually quelled by my colonial forces, while Transvaal has been freed from the depredations of a powerful chief who having successfully resisted the former government of the country had persistently rejected our attempts at conciliation. I have reason to hope that the time is now approaching when an important advance may be made towards the establishment of a union or confederation under which the powers of self government already enjoyed by the inhabitants of Cape Colony may be extended to my subjects in other parts of South Africa. Papers on these and other matters will be forthwith laid before you.

Gentlemen of the House of Commons: I have directed estimates of this year to be prepared and laid before you without delay.

My Lords and Gentlemen—The commission which at the close of the last session informed you I had issued to inquire into the causes of agricultural depression throughout the United Kingdom is pursuing its labors. In the meantime the serious deficiency in the usual crops in some parts of Ireland has rendered necessary special precautions on the part of my government to guard against the calamities with which these districts were threatened. With this view they have called upon the authorities charged with the duty of administering relief to make ample preparations for the distribution of food and fuel, should such a step become necessary and they have also stimulated the employment of labor by advances on terms more liberal than those prescribed by existing law. I feel assured that you will give your sanction to the course which has been adopted where it may have exceeded the power entrusted by parliament to the executive of the government. A proposal will be submitted to you for providing the funds required for these exceptional advances on security of the property administered by the church temporalities commissioners.

The queen refers to certain measures to be considered and concludes

"I trust that the blessing of Almighty God will attend and direct your labors."

Lords Beaconsfield and Salisbury were not present at the opening of parliament. The queen's reception by the crowd on the street was very enthusiastic. There was the usual search for "Guy Fawkes" in the cellars of the house of commons this morning.

As conservative majority no longer exists and the government will soon have to rely upon the support of the national liberals which fact will certainly have some influence on the development of the church question.

The bill was laid aside as was a number of other bills.

The bill amending the census act and requiring enumerators in cities having over 10,000 inhabitants to be completed within two weeks after June 1st instead of four weeks, and containing provisions as to details was considered and finally passed.

Senate went into executive session.

The senate bill for the conversion of national gold banks passed.

McLane, chairman of the committee on Pacific railroads reported a bill to create a sinking fund for the Kansas Pacific, Sioux City and Pacific and Central branch of the Union Pacific Railroad Co. Printed and recommitted.

The following bills were introduced by O Connor and referred, making silver certificates receivable at the U S treasury in the redemption of silver [illegible] notes by the national banks requiring the secretary of the treasury to pay current interest on all registered U S bonds without respect to date of assignment or transfer.

Consideration was resumed of the bill regulating the removal of cases from state to federal courts.

After morning hour the house went into committee on revision of rules.

Cobell moved to amend rule 11, giving the committee on railroads and canals jurisdiction over the improvement of navigable rivers.

Frye submitted an amendment excluding the Mississippi river, aiming that there was prodigality in appropriations for the east and parsimony in the west. He finally withdrew the amendment and Cobell amendment was defeated 63 to 83.

Shellabarger submitted an amendment giving the committee on public buildings jurisdiction over appropriations for public buildings.

Randall and Clymer opposed the amendment.

Calkins appealed to the members to strip the appropriation committee of the power of placing legislation on the appropriation bills.

Gillette favored the amendment. The proposition that the appropriation committee should control the appropriations of the house was as antirepublican as slavery and its effect was to absolutely disfranchise nine-tenths of the representatives of the people. The amendment was adopted 100 to 81.

Chalmers moved an amendment giving the committee on levees and improvement of the Mississippi river jurisdiction over the improvement of its tributaries. He said that Springer of Illinois had at the extra session offered a resolution to distribute the work of the house but the enemy had captured him.

Robinson called attention of the committee to the fact that if adopted, this amendment would give the committee of the Mississippi levees jurisdiction over nearly every stream between the Alleghany and Rocky mountains.

Frye submitted an amendment limiting the jurisdiction of the committee on Mississippi levees to the levees of the Mississippi.

Without action the committee rose.

Davis, from the banking committee reported back the bill authorizing national banks to make loans on mortgages of real estate. Ordered printed and recommitted.

SPECIAL DISPATCH TO THE OREGONIAN

SALEM Feb 5—One of the Northcutt brothers wealthy farmers living near Wheatland was stopped on the highway to day and robbed of $3800. He had just arrived from Portland on the steamer [illegible] and was going from Wheatland toward home when a man wearing a mask stepped into the road from a neighboring thicket and leveling a shotgun ordered Northcutt to stand and deliver which he did without parley. Officers are in search of the robber whom Northcutt thinks he can recognize.

AN ALLEGED CONFESSION

William Tubbs a Murderer and Suicide, said to have Acknowledged Murdering Conrad Warner near Salem—Other Acknowledged Murders.

The Salem *Statesman* of yesterday contains the following strange story of a confession which sounds very much like a cheap novel:

The citizens of Marion county still remember the thrill of horror that startled the whole community a few years ago when Conrad Warner was murdered in open daylight on the public highway almost within sight of the city of Salem. The murderer made good his escape and a deep mystery shrouded the whole transaction and the secret remained unsolved to this day. After nearly six years of time a solution of the mystery is now for the first time made public. A Mr Munsell of Buena Vista gave us the following solution.

The citizens of Polk county, and especially in the vicinity of Buena Vista will remember one William Tubbs alias William Franklin who some time in the year 1877 married a Miss Browning near Buena Vista and the tragical end of the wedded pair on July 4, 1878. It will be remembered that in a fit of jealousy Franklin on that day shot his wife killing her instantly, and then immediately killed himself. It appears that the married life of Franklin and wife was one of continued domestic infelicity and on several occasions separated only to be reunited. A few days before the fatal fourth of July, Mrs Franklin told Mr Munsell that life to her was a burden that she was wedded to a man with whom she could not live and that she dare not leave him. She said that he knew he would in his confiding moments he had told her the history of his life under the pledge of secrecy to be paid by a forfeiture of her life if she ever revealed his secret. He said that he had in his life time murdered fifteen men, that one of them was a negro in Jackson county, from whom he got $1,500; that he was the man who killed Conrad Warner near Salem, that he did it with the expectation of getting $200 the price of a span of horses sold by Warner a short time before. Franklin said that he knew when the horses were sold, the price, and the time payment was to be made, and he resolved to get that money when paid, and for that purpose laid his plans, he waylaid Warner on his road home stopped him in the road shot him dead and after rifling his pockets started the team homeward in the road, and then made his way through the woods and by ways to Scio and southward through Linn county, thence across to the westside of the river into Polk county, where he has resided most of the time since. Franklin gave his real name as William Tubbs.

FRIDAY MORNING FEB 6 1880

THE WASHINGTON LAW

Washington territory had long felt as Oregon still feels, the need of an improved revenue law Her statutes relating to assessments and collection of taxes were extremely unsatisfactory in their operation But at the last session of her legislature a bill was reported providing for a reorganization of the whole system Upon this bill much labor had been expended, and it was enacted into a law As printed it covers about sixty pages While we find some things in it which we think could be improved it must be acknowledged that it is on the whole a well considered and comprehensive act Its provisions to secure taxation of notes and credits will however fail to a great extent or be inoperative as such legislation always must for notes and credits usually find means of concealment and no inquiry or vigilance can reach them But the law of Washington territory unlike ours does not add to this evil by allowing indiscriminate deductions of indebtedness It simply allows any person to deduct from his unsecured credits all bona fide debts owing by him whether on account contract note mortgage or otherwise That is the taxpayer's debts may be set off against dues owing to him which may be unsecured and are not allowed to diminish the valuation of his visible and tangible property In the case of a mortgage or other security the value of the property affected by such mortgage less the value of the security is assessed to the owner of the property and the value of the security is assessed to the owner thereof in the county in which the property affected thereby is situated The taxes so levied are a lien upon the property and security and may be paid by either party If paid by the owner of the security the tax shall become part of the debt so secured But if the tax on the security be paid by the owner of the property, it constitutes a payment on the debt. Every contract made, by which a debtor is obligated to pay any tax or assessment on any money loaned or on any mortgage or other lien, is pronounced null and void, and properly enough The act goes into very extended details on all branches of the subject of making valuations for taxes, and is an act which may be studied with advantage by those who are to undertake tax reform in our state.

SUGAR FROM SORGHUM

We spoke the other day of the efforts to be made at Puyallup (Washington territory) this year, to prove that sugar beets can be successfully grown But the commissioner of agriculture in his report for the year 1879, is convinced that solution of the sugar problem for the United States is not to be found in production of sugar from beets but from sorghum. Speaking of successful efforts which have recently been made to produce crystallized or granulated sugar for sorghum, he says he is warranted in asserting that it has thus been finally proved that this product, one of the most important and indispensable requisites of modern life, can be grown where heretofore it was supposed not possible to produce it, that it can be manufactured in quantities sufficient to meet any demand likely to occur, at a remunerative rate even if the price should fall one third below what it is now, and this in no limited area of country, but in whatever place cane can be successfully grown The difficulty was for a long time to get the syrup to granulate. And this obstacle he says confidently has been overcome by recent experiments and discoveries

The people of the United States pay annually over $110,000,000 for the foreign sugar and syrups which they use In 1876 they consumed 1 638,719,324 pounds of foreign sugar and 162,049 557 pounds of domestic, including maple and sorghum In 1877 the consumption of foreign sugar had fallen to 1,605,036,114 pounds, while that of domestic sugar had risen to 187,[illegible]644, an indication, perhaps, of the extent to which the domestic production is encroaching on the foreign import In view of the fact that France, by her wonderful development of the sugar beet industry, not only produces enough domestic sugar for her own consumption, but is a large exporter of refined beet sugar at prices with which the tropical product cannot compete and that Germany is rapidly following in the footsteps of France, it is a disgrace to the United States, with its sub-tropical southern climates and the semi-tropic summers of its interior northern plains, that it is yet dependent on foreign countries for nearly nine-tenths of its sugars. There is no reason in the world why it should not, like France, produce at least all the sugars it consumes.

But unless the commissioner of agriculture and experts who have been devoting much time and attention to the subject are greatly mistaken, a foundation has been laid for an industry which, in time will supplant foreign sugars with home supply. It will be no great while till we shall see how much there is in these confident predictions.

A bill providing for a "no fence law" was introduced in the legislature of Washington territory at the session of last fall, but was defeated Journals of Eastern Washington continue, however, to demand such law and this will probably be the main issue in election of members of the next legislature for that part of the territory. Such law would also be very beneficial to a large section in Eastern Oregon And recently we have heard that it is being agitated in localities in the western part of the state, notably in Benton and Polk counties The true principle, in fairness and equity, is to require persons who have animals to take care of them, so that they may not annoy or injure neighbors. And this is a general principle, though there are localities where the cost of building fences is so little that the principle may be suspended But where fencing material is very dear, as it is in large sections of Oregon and Washington, it is a heavy drawback to the settlement and development of the country, and great injustice to individuals, to require each farmer to fence against everybody

The Standard troubles itself with a dream that the editor of THE OREGONIAN is desirous of establishing his command over the republican party of this state, that he is playing the game finely but that there is a turbulent spirit which will not down at the command of the dictator and so on and so on Here a newspaper like THE OREGONIAN is judged by a petty organ like the Standard from the latter's own standpoint To such petty organ it is inconceivable that there should be any journal which is conducted solely for journalism without a view to side jobs in the supposed schemes and profits of party politics The editor of THE OREGONIAN has no command in party seeks none and would accept none He is entirely content with running the newspaper business for its own sake—that is to furnish a journal which will be sought by the public as the most complete and most trustworthy medium of intelligence which the country affords To fill this place and supply this want is business enough

Ex-Minister [illegible]burne has been making a very thorough study of the relations which Thomas Paine held to the French revolution and has prepared an elaborate paper on the subject which will probably appear in the May number of Scribner's Monthly Mr Washburne avoids all the questions in relation to Paine which have excited so much discussion in the United States as well as in England for the last century and has confined himself simply to the status which Paine occupied during the French revolution

Stephen Maybell the Willamette Bridge port is king pin of the sand lot representatives in the California legislature The editor of the San Jose Mercury writes that Maybell is something of a wag and would do well in a circus ring He and his associates are evidently doing all they can to block legislation and make a long session as eight dollars a day with stamps and stationery is the best thing they ever struck in their lives Maybell pops up from twenty to fifty times a day and the less he knows of a subject of course the more he says about it

President Seelye of Amherst college President E H Capen of Tufts college and President Chadbourne of Williams college have written letters to the Springfield Republican expressing intense opposition to the nomination of Gen Grant The same paper also publishes letters from ex Gov Washburn Col T W Higginson and Rev James Freeman Clarke to the same effect the opposition of the latter being so strong that he hardly thinks it possible that he should vote for him if he should be nominated

Here is one of the blasts from the trumpet of the Auburn Chronicle one of the organs of the recent political swindle in Maine Come on you rebel hellions, you tramplers on the constitution you usurpers of the people's liberties you bribers you conspirators you revolutionists Barking dogs seldom bite Have you got any teeth? If so it is time to show them And to think that a party whose organ did this heavy brokerage in blood and wind "flunked" at the last pinch, and without an effort!

The New York Times recently said that whenever Grant should become an active contestant for the presidency that is, when he should engage in active intrigues or efforts to secure delegations or fractions of delegations to the Chicago convention he would be virtually out of the race. Now this is just what has been done through his backers, in Pennsylvania, and what he will attempt in other states But it will arouse an opposition that will put him out of the race The Times is right.

According to the New Northwest, the faculty of Pacific university (Forest Grove) have refused to receive into their preparatory school a Portland boy of illegitimate birth, on the ground that the child of such a mother as his could not be admitted into their ranks If Forest Grove cannot do better than this, it is evident there are problems in the moral regeneration of the world which its Christian culture and principles are not yet prepared to grapple with, and some tougher fibre is necessary

There is nothing to prevent a man who imagines himself governor of a state from issuing an "inaugural address" so that the man named Smith, a citizen of Maine who is out with an "inaugural" is probably breaking no law but only making a fool of himself on an immoderate scale

There is a dispute between the New York Herald and Sun as to which has the larger circulation, and one offers to bet $5000 that it beats the other from 3000 to 5000 The circulation of the respective journals is claimed to be from 113 000 120,000

Hen Owens' water works like his swamp land scrip, somehow don't materialize. There is reason to fear he will never get back the $350 which it is reported the organization has cost him

From its count of Grant votes in the national convention the New York Herald should subtract the six to be sent from Oregon. The republican sentiment of Oregon is not for Grant

They say District Attorney Caples has to work mighty hard these times to put them in as fast as Gov. Thayer lets them out But so far it seems about an even race.

MAGAZINES FOR FEBRUARY

The first article in the North American Review for February is by Cardinal Manning, and treats of the relations of the Catholic church to modern society. The article is strictly partisan, in keeping with his long uncompromising championship of the papal prerogative, but able and candid He simply essays to determine "what can be and what ought to be the relations of the church in the nineteenth century, and the political society of the world in the nineteenth century." It will be read with interest by both the friends and the opponents of the Catholic church, and while exciting the admiration of the one must claim the respect of the other An article on "The Third Term," by Senator Howe, one of the little Grant group in the senate has already been reviewed by THE OREGONIAN, and its fallacies shown Rear Admiral Ammen contributes a paper on "M de Lesseps and his Canal," which contains much valuable information relative to the proposed inter oceanic canal It is however, much marred by a pettish spite toward the distinguished Frenchman with whom it deals Either Admiral Ammen does not understand the courtesies which should obtain between gentlemen, even in dispute or he willfully disregards them Indeed in reading his article, one is impressed that he is jealous of the fame of M de Lesseps An article on America by Mr George Augustus Sala, the distinguished English journalist, who is now in this country is a most sensible and delightful production He compares the America of to day with the America of eighteen years ago and sees developments which having been accomplished gradually have passed by us unnoticed, just as an annual visitor detects the growth of a child, which is not apparent to the parent who sees it every day He makes some comparisons of the cost of living in New York comfortably and in the large cities of European countries with some observations upon the influence of the monetary unit upon the matter altogether in creating and valuable His criticisms too upon American life and manners are so obviously just and politely said that our national eagle himself cannot feel that a single feather has been ruffled A historical paper on "The Emancipation Proclamation" by President James C Welling is of solid value and is made curiously interesting by a fac simile of the famous Greeley letter written in August 1862 by Mr Lincoln The book reviews of this number are written by Mr Mary W Hazeltine [illegible] by Appleton & Co 549 and 551 Broadway New York $5 a year

The February Popular Science Monthly is up to the high standard of that admirable publication The first article is by Wm W Billson on the "Origin of Criminal Law" and is interesting to the lawyer and the people and to both instructive He shows how at first governments recognized only crimes against itself such as treason and how primitive law had no application to crimes against persons Men had to protect themselves which they did by the system of private avengement of wrongs Other features of this number are Saporta's W[illegible] [illegible] the Ap[illegible] pearance of Ma[illegible] (Illustrated) "How Typhoid Fever is Conveyed" by Dr I J Madigan Hanoverian Village Life by Walter Nordhoff Maps and Map Making before Mercator by Charles P Daly LL D (illustrated) Ancient Methods of Filtration by Prof H Carrington Bolton Ph D John Stuart Mill VI by Alexander Bain LL D Imperfections of Modern Harmony by S Austen Pearce Mus D Oxon Daylight in the Schoolroom by M Javal Hygiene in the Higher Education of Women by A Hughes Bennett M D "Artesian Wells and the Great Sahara" by Lieut Seaton Schroeder U S N The Origin of the Gypsies Prehistoric Records Sketches of Benjamin Silliman with portrait and editorial and other departments) Appleton & Co [illegible] a year

THE HARRISON STREET SCHOOL

DESCRIPTION OF THE NEW BUILDING

A well-arranged well ventilated Edifice—List of Teachers—School to Open next Monday—General School Notes

The new Harrison street school building having been completed [illegible] reporter in company with Superintendent [illegible] visited it [illegible] The building is [illegible] feet wide by one hundred and fifty feet long [illegible] twelve feet high [illegible] furnishes [illegible] It is well lighted and ventilated [illegible] the level [illegible] The furnace of Harvey [illegible] water apparatus [illegible] is located in [illegible] the building

There are three stairways [illegible] front [illegible] from the [illegible] all [illegible] stairways to the [illegible] floor On the first floor are six rooms [illegible] doors The teachers [illegible] the rooms comprising the suite are 21 by 38 feet and will comfortably accommodate [illegible] scholars The rooms at the east and west ends are 19 by 38 feet and will accommodate about [illegible] scholars The second story rooms are exact duplicates of those in the first floor The building is finished with clear ash oiled and oiled and all the halls are wainscotted with the same durable lumber The black boards considered the most substantial in the city are dull green and extend around the walls of every room Each window is provided with inside blinds of Port Orford cedar The desks are made of ash to match the finish They are so arranged that the rays of light from the north and south windows fall on the desks either the right or the left of a pupil and all danger of injury to the eyesight by direct or reflected rays is obviated Each room is provided with two hot water radiators which will serve to suitably warm the building however low the temperature is outside The ceilings are sixteen feet high and the ventilation all that could be desired The school is provided with a splendid clear toned bell weighing 550 pounds, which can be heard in the north school The principal and the scholars have contributed to the purchase of a large flag which will be hoisted next Monday

The building will commodate between 500 and 520 pupils It is too small even for present needs, to say nothing of the future. The taxpayers of the district certainly made a grand mistake when they instructed the directors to build on the old foundation and it may prove a piece of false economy It is a noticeable fact that there are 100 more children in actual attendance from the Harrison street school district—that is the portion of the city south of Columbia street—than at this time last year, while there is but a small increase in the attendance of the Central and North school

The Harrison street school will open next Monday with Prof W Pratt as principal and the following corps of teachers

Mrs C P	Morton	5d grade
Mrs A B	Burnham	3d grade
Miss M E	Frary,	4 grade A
Miss L I	Rittenhouse	4th grade B
Miss F E	Young,	3 grade A
Miss M L	Powell,	[illegible] grade B
Miss N E	Taylor,	[illegible] grade A
Miss M E	Test	6th grade A
Miss N F	Meacham	6th grade B
Miss M S	Clarke,	7 grade A
Mrs Julia	Simpson	[illegible] grade A and B
Miss Nettie A	Cook	7th grade B
Mrs L A	White,	[illegible] grade

Mrs Morton and Miss Frary, with their respective scholars will occupy the north wing of the lower floor of the Park building. The following teachers will occupy the second story rooms of the Harrison street building Prof Pratt, Misses Irnham Rittenhouse, Young and Test, and Mrs Julia Simpson, and the following the first story rooms Misses Powell Taylor, Meacham, Clarke and Cooke and Mrs White

School Notes.

Since January 1st there have been two resignations by teachers viz Mrs L E Yates of the North school and Miss L W Spaulding of the Central The vacancy in the North school has been filled by promotion of Miss G I Parker and Miss L M Gantenbein and the election of Mrs Isabella Baker The Central vacancy has been filled by the promotion of Mrs C M Fear and the election of Miss Ellen J Chamberlin The entire corps of teachers has been increased by the election of Misses Test, Meacham and Cooke

Prof Pratt will meet his teachers at the Harrison street school Saturday afternoon at 1 o clock, to arrange all preliminaries for the occupation of the new building

There were registered at this time last year 2150 scholars, and an actual attendance of 1690 There are registered this year 2190, and the actual attendance is 1815 It shows a healthy interest in the schools on the part of both parents and children

The second story of the Park building will be occupied by the high school, and two rooms in the first story by Harrison street pupils There will be four vacant rooms in the Parkone in the Central, and one in the North school

LECTURE ON HEALTH IN SCHOOLS

Dr [illegible] paper on this theme was presented in a [illegible] form by Mr Eliot at the Unitarian [illegible] Wednesday evening The name of the author is identified with the [illegible] efforts [illegible] behalf of a more thorough and [illegible] of such subjects as [illegible] conditions in buildings and [illegible]

[illegible] paper the conditions of [illegible] viewed in view of their [illegible] Reference [illegible] the children share [illegible] the inhabitants [illegible]

[illegible] physical [illegible] work upon the [illegible] a great [illegible] These [illegible] A strong heart [illegible] nerve tissue must be nourished by a well aerated blood [illegible] frequent short rests which recover the [illegible] better than longer rest after the longer effort The avoidance of anything like [illegible] A child is volatile [illegible] premature attempts to force protracted attention are secured at the risk of his physical and mental health

The danger was dwelt upon of mental work and excitements for children who are physically [illegible] this way are hastened sexual crisis which place in peril both health and morals I am speaking of a great evil and one little understood [illegible] which the remedies are to be found in a liberal stimulation of all the nobler parts of a boy's nature at once—his will his courage his fortitude his honor his sense of duty his interest in some mental pursuit

What constitutes the true measure of physical exercise—and what will furnish the best exercise? In answer to these questions the principle was laid down, Never let the bodily exercise be so crowded in to a corner by work that you cease to enjoy it Nor should it be violent and spasmodic as in the gymnasium or competitive sports The natural forms, such as bring successive muscles into action rhythmically were commended as walking dancing and running To precipitate muscular effort in single direction is bad and tends to malformations Yet while holding to natural physical exercises as best the author calls for systematic physical training especially in the matter of respiration We have no more right to leave this to nature as we phrase it than to leave the mental processes without direction and aid

Happiness is of itself one of the surest sources of health and there is pleasure in all efforts made willingly if within our homes This fact was made the basis by the essayist of some most wise principles for the conducting of schools The success of a school, hygienically, mentally and morally, may be fairly tested by the presence at all times of full happy interest on the part of the children On the other hand when these conditions fail, either through physical neglect, or too hard tasks, or undue fears and needless restrictions upon freedom and individuality, we have a mental analogy of what takes place in a fatigued muscle. In the mind there is depression of spirits, irritability and perhaps actual disease, such as chorea, or other weaknesses and even moral aberration. The doctor dwelt forcibly upon the danger arising from arousing exaggerated feeling of any kind, either of emulation or apprehension, in the management of schools We need the antiphony of effort and pause in mental as in physical operations and reciprocally from mental to physical effort"

The subject of diet led to a strong condemnation of the use of coffee and tea by children under 16 or 18 years of age These are mobilizers of force and are like the hair spring upon a rifle The expenditure of nervous force is easier but a corresponding danger arises of explosions Trousseau was quoted as an authority for the observed widespread harm done by the careless use of these stimulants The reader then made selections from the statements of several eminent physicians and educators bearing upon the prevalent neglect of proper ventilation in school rooms, the presence of much needless formality, non-attention to the physical welfare of the children, and the injurious effects of bad social habits or circumstances lying outside of school life Brief reference was made to school gymnastics and the care of the eyes, and the need was adverted to of co operation between parents and teachers in order to secure wise reforms in school and home life

Excellent music was furnished before and after the lecture The attention of the audience was closely held to the end The next lecture of the course is by Dr Harvey upon the "Races of America Socially Considered," and will be given Feb 18th

FRIDAY MORNING, FEB. 6, 1880.

THE PENITENTIARY AND ITS MANAGEMENT.

ALBANY, Jan. 30, 1880.

TO THE EDITOR OF THE OREGONIAN:

In your paper of the 29th inst. appeared a communication signed "Paul Pry," in which the author claims great reforms and economical management of our state penitentiary. He claims that Superintendent Bush has turned over to the state treasurer $7,856 69, but "Paul Pry" fails to tell how much of this amount the present superintendent has collected on notes and accounts for convict labor, turned over to him by his predecessors in office. On examining the reports of Superintendent Burch, we find that he turned over to Mr. Bush, his successor in office, the following notes and accounts, which were the proceeds of convict labor performed during Watkinds' and Burch's terms of office, and which are receipted for by Mr. Bush to ex-Superintendent Burch:

Walter Jackson	$ 482 00
United States	1457 95
J Osborn	4 10
B. Cave	3 20
J. C. Bell	6 40
A. J. Brown	25 43
O. A. Waller	12 80
J. P. Irvin	28 50
A. J. Downer	100 25
Capital Leather Co.	471 18
Bennet & Harvey	217 45
W. H. Watkinds	490 17
S. Brown	82 50
J. Hackleman, note	400 00
S. Hamilton, "	10 00
F Henschell, "	1062 37
Herman & Hirsch, note	250 00
D. H. Murphy, "	81 55
Joseph Holman, "	923 35
George Collins,	312 25
Total	$6401 47

From this it will be seen that the present superintendent had good notes and accounts turned over to him for collection, which amount to within $1455 22 of what has been turned over by him to the state treasurer, and it is fair to presume that they have all been collected. To show that this is correct, we find, by referring to Mr. Bush's reports published in THE OREGONIAN, that only a small amount of earnings is reported by him from the four principal branches of business carried on at the prison, viz.:

J. H. Stahley	$ 626 25
O. F. Dennis	353 95
Geo. Collins	239 00
Capital Leather Co.	48 50
Sundry persons	30 25
Total	$1297 95

This amount according to his own reports is all the money that has been turned over to the state treasurer during Mr. Bush's administration. And, in this connection, I would like for Mr. Bush or "Paul Pry, Esq.," to explain why it is that the Capital Leather Manufacturing Co. has only paid in the sum of $48 50, during four years, when their lease calls for no less than 25 convicts per day, making $12 50 per day, or over $14,000 for the four years. Has this been collected? If not, why not? Everybody else that ever owed anything has been sued or forced to pay. Further, to show that this is correct, I find by the reports published in THE OREGONIAN, that the following amounts have been collected on notes and accounts turned over to Mr. Bush by his predecessors in office, viz:

L. F. Grover on account of Walter Jackson	$ 370 60
Keeping U. S. prisoners	1154 61
E. and L. Hirsch	442 33
J. Downer	119 72
F. Henschell	823 60
J. P. Irvin	23 50
Bennet & Harvey	87 43
Capital Leather Manufacturing Co.	66 50
J. H. Hackleman	452 85
Geo. Collins	312 00
W. H. Watkinds	530 80
D. H. Murphy	17 00
Total	$ 5155 19

These are Mr. Bush's own figures, and of course are made to show to the best advantage. Deducting the cash, notes and accounts turned over to Mr. Bush by his predecessors, which have been collected, we have the following showing: Amount turned over to the treasurer, $7856 69; amount notes and accounts collected by Superintendent Bush, which were turned over by his predecessors, $6401 47. Thus it will be seen that the entire earnings of the penitentiary for fourteen months, which have been turned into the treasury, shows the paltry sum of $1,455 22. By dividing this amount by the average number of convicts claimed (175), it will be seen that each prisoner has earned per month $00 59plus, or $00 019plus or nearly $00 02 per day. This is what "Paul Pry" styles a "self-supporting institution." But we find on examining Superintendents Burch and Bush's reports, published in THE OREGONIAN, that warrants have been drawn on the state treasurer from Sept. 1, 1878, to Dec. 1, 1879, for $25,896 76, instead of $18,203 49 as stated by "Paul Pry," and there has only been turned over to the state treasurer for the earnings of the convicts during the same period the sum of $1455 22.

By this showing, it will be seen that it is very far from self-supporting. And it must be remembered that Mr. Bush has had all the benefits of the factories and machinery to utilize the convict labor, which were erected during Watkinds' administration at the cost of thousands of dollars. There has not been a single improvement made on the prison grounds during Mr. Bush's administration.

The convicts have been allowed to lie idle in their cells. By reference to the above figures it will be conclusive to taxpayers of this state that no man can superintend a penitentiary and its inmates by remaining in his private banking office and visiting the workings of that institution once or twice a month, and being absent from the state two or three months at a time, even though he promise to draw no salary for his services as superintendent. Again "Paul Pry" claims that "great credit is due to Warden Miller for the discipline visible on every hand."

No greater mistake could have been made by "Paul Pry" than this, for it is a notorious fact that convicts have been allowed to be on the streets of Salem at night, and in low gambling dens, intoxicated and gambling, during their sentence at the penitentiary; whose names can be given if necessary; and convicts have been allowed to go round in the neighborhood of the prison, stealing chickens, butter, eggs and vegetables, and we are told that they have gone so far as to steal pigs from the prison and trade them off for opium to Chinamen in Salem. Convicts who had wives have been seen at home with their wives during their pretended confinement; and if any person doubts these statements he has only to inquire of the city marshal and the neighbors near the penitentiary. If this is discipline and reform in the prison affairs, then all the able authorities on prison discipline, who have spent years of toil in investigating different modes of governing and controlling penitentiaries, are to be ignored; for from them the world derives all its valuable information on this subject.

In conclusion, permit me to say that I fully agree with your correspondent that the reform and economy in the secretary of state's and state treasurer's office will be duly appreciated by the tax payers of this state. And I am proud to know that our worthy secretary, Hon. R. P. Earhart, filed his protest against the swindling sale of certain property belonging to the school fund in the city of Portland, some time ago, at one third of its value.

NOSER NO. 2.

The Great Northern Country.

[From the San Francisco Bulletin.]

A colony from the northern states is about to settle in the Puget Sound country, and another in Shasta county, in this state. One or two colonies are also making preparations to settle in Southern California. Up to this date no colony has settled in Alaska. There was a little prospecting done by the representatives of a proposed Iceland colony, but while the report was in many respects favorable there was no other result. The country is so large and there is so much vacant land that colonists are not driven by any necessity into the extreme northwest. The Puget Sound country fills up slowly. Its magnificent forests invite the lumberman more than the agriculturist. When the lumber interest first invites attention, agriculture is for a time in the back ground. Yet all the cereals are produced with as little trouble in Washington territory as in any part of the United States. After one has reached the southern line of Oregon the question of irrigation is dropped. The amount of moisture increases for the next 1500 miles. No farmer in Washington territory ever concerns himself about irrigation. The clouds distil rain enough for all his wants, and frequently more than accords with his ideas of convenience. The Puget Sound settler has certain great advantages. He has timber, running water, a fertile soil, mild climate, and always moisture enough to ensure the certainty of crops. He has also, at no [illegible] distance, the most remarkable land-locked body of navigable water in the world. It is not then a wonder that colonists from the far east should [illegible] with some favor upon such a country. There will be great openings in the forests. For centuries to come spars will be furnished to the maritime world from Puget Sound. The coal mines will produce cheap coal for steam; and one of the great wheat ports of the northwest will be at the final terminus of the Northern Pacific railroad.

The money market in San Francisco according to an exchange from that city, is in a very plethoric state with but few and limited calls on the savings banks on real estate securities. The "boom" in business seems to have had as little effect on the bay city as on any other great trade center in the whole country.

The enormous quantity of grain produced in the United States may be judged from the fact that on the first day of January there was stored in the city of New York and afloat in the harbor, awaiting orders for shipment: Wheat, 9,714,237 bushels; corn, 1,707,079 bushels. In Baltimore at the same period there was in store: Wheat, 1,515,745 bushels; corn, 755,334 bushels. In Philadelphia: Wheat, 748,658 bushels; corn, 292,296 bushels. In Chicago: Wheat, 7,994,237 bushels; corn, 406,974 bushels. In Boston: Wheat, 154,541 bushels; corn, 874,311 bushels. In Milwaukee: Wheat, 8,949,100 bushels; corn, 248,000 bushels. In St. Louis: Wheat, 1,020,281 bushels; corn, 1,401,925 bushels. In Toledo: Wheat, 1,127,000 bushels, corn, 418,000 bushels. In Detroit: Wheat, 1,456,000 bushels.

In the local markets there is but little subject matter for comment. The wheat trade still drags and transactions on the basis of quotations are confined to few parcels and those of small quantities.

Flour is dull and holders would have to accede to a slight reduction on current quotations, which are for jobbing rates. The stocks on hand are somewhat large, and state mills are sending forward considerable supplies. Oats are dull, with a demand only for local consumption at about 40c per bushel for fair feed and an advance of 1 and 2½c for extra choice for milling purposes. Potatoes are still very slow sale at the same low prices which have ruled for a long time past. Onions are in a little better demand and prices slightly improved. Dairy products are in ample supply, without any special shipping demand. Eggs have declined.

The expected activity of the wool trade is the topic of considerable attention in commercial circles. A New York trade circular of the 20th ult. says:

The future of wool is an interesting problem to all interested in the trade. As long as our deficiency could be supplied from abroad, at low prices, there remained but little chance for a further advance here. But the magnitude of the American demand has already advanced the price while reducing the stocks of such wools as our tariff allows us to import, and it is the impression of our foreign correspondents that a further advance will shortly take place. Manufacturers will be taxed to their fullest capacity for months to come to supply a demand for goods produced by years of economy during which time millions of consumers have been added to the population. Farmers are in a position to hold their clips this year, and will probably do so, and the natural conclusion is that we shall have a steady, strong market, even if there is no advance in prices for three or four months.

Taxation.

PORTLAND, Jan. 31, 1880.

TO THE EDITOR OF THE TELEGRAM:

I beg to assure the First National Bank and Ladd & Tilton that I had no desire whatever to challenge their integrity or doubt their tax statements. What I did was merely to publish in self defense the official statement procured by me from the county assessor of the various state and county taxes paid by all the banks in this city, including our own (which shows no taxes paid by First National Bank), in order to refute a malicious attack made by a correspondent in THE OREGONIAN (who had not the courage to sign his name or even a cognomen), to the effect that our bank paid no taxes whatever and secured that our borrowers at the same time deducted every dollar from their property returns of their indebtedness to us payable at London, Scotland, a statement which the writer, whoever he was, knew to be false. Had The Oregonian had, as it ought to have done, given me before publishing that malicious letter whether the statements therein were true, neither the names nor statements of taxes of the First National or Ladd & Tilton or any other bank would have been published. But I was bound for the protection of the interests of our bank, to show, by comparison with the other banks' tax returns, that we paid our share of taxes equally as they did. Pardon me in saying one word. The taxes which all national banks, as corporations, do pay to the United States are no more and no less than what all other banks in this city pay to the United States for the same facilities, including our own bank, excepting this, that national banks are not required and do not personally pay any state, county or city taxes as the other banks in this city do. The taxes which our bank offered to pay and do pay on $40,000 were entirely gratuitous as there is no law to compel us to pay any taxes whatever.

I know that persons who are unfortunate enough to be afflicted by any form of sexual disease have a delicacy in calling upon the proper physician in time, from a sense of modesty and sometimes from ignorance, and permit those diseases to exist until their constitutions become corrupted, their organization broken down and the hope of future happiness blighted, until death becomes a welcome messenger to carry them out of their miserable existence.

5,000,000

Acres of its lands in the Pen d'Oreille Division in Eastern Oregon, which are comprised in the odd numbered sections for forty miles on each side of the railroad as now located from the mouth of Snake River, in Washington Territory, to Lake Pen d'Oreille, in Idaho. These lands of unexcelled fertility, and adapted to farming on any scale that may be desired, are offered by the Railroad Company at such prices and terms as cannot fail to induce settlement and cultivation, ensuing a rapid growth in population of the country, and increase in value to those who now purchase.

The following Resolution of the Board of Directors of the Railroad Company, passed November 19th, 1879, fixes the cash price of land to actual settlers at two dollars and sixty cents per acre, which it is believed is a lower price than has ever been voluntarily placed upon its lands by any land grant company. This is, in fact, cheaper than the settler can purchase the same class of land of the Government under the pre-emption law, for the expense attending the making of final proof, and the journey to the land office which he must necessarily make in order to complete his entry, is more than the ten cents per acre added to the government price by the Railroad Company:

"Resolved, That the Agricultural Lands of the Company west of the Missouri river to Puget Sound shall be offered for sale to actual settlers at Government price of $2 50 per acre, with an additional payment thereto of ten cents per acre to be paid to the Company to reimburse it for the cost of selecting, surveying and conveying said land.

"This resolution does not apply to coal or iron lands, nor to lands chiefly valuable for timber, nor to lands required for town sites or suitable for manufacturing sites, nor in regions where water is scarce to lands containing springs or other natural supply, where it shall be for the interest of settlers at large that such water privileges shall not be exclusively held or controlled by any individual; nor to the lands required for the use of the Company in connection with the operation of the road."

To persons wishing to purchase on time, the remarkably low price of four dollars per acre is given on the following terms: One-fourth cash at time of purchase, the balance in three equal yearly payments at 7 per cent. interest. The above price for time sales is adopted for the present, but may be subject to change in the future.

All persons who have filed with the Railroad Company notices of intention to purchase, or "Settlers' Applications," as they are called, for land in this Division (except for the class of lands reserved by the terms of the resolution above given) and who have continued to reside upon or cultivate the land applied for, are requested to complete their purchase by making cash payment, or time contract, for the same. For this purpose application should be made to the Railroad land Office at Colfax.

Persons who have not made actual settlement or improvement upon land they may have applied for, have no right to the first privilege of purchase; such lands will be sold to the first applicant. Those persons who have in good faith settled upon and improved the Company's land should lose no time in securing the same, as after given that the land is subject to sale to any other person.

The land in this division being now offered for sale, no more "Settlers' Applications" will be filed. All communications respecting land in the following described Townships—

MIDDLE AGED MEN.
There are many at the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.
